## Deployment Status

**PENDING:** Awaiting GitHub push

## Why it's not live yet:

The GitHub token used in the repository remote URL is expired/invalid. Authentication is required to push the committed changes.

## What happens after push:

1. Vercel automatically detects the push
2. Builds the new App Router version
3. Deploys to esgpro-pricing.abacusai.app
4. Live site updates with £2,400 pricing

## Next Steps (Choose One):

---

1. **Get new GitHub token and push** (see DEPLOYMENT\_INSTRUCTIONS.md)
2. **Use Vercel CLI after login**
3. **Manually upload files via GitHub web interface**
